

Liquid Crystal
OPUS

Complete your prints with our wash and cure units designed for your LC Opus. Our wash units remove all excess resin within minutes while our cure units strengthen your parts delivering maximum material properties.

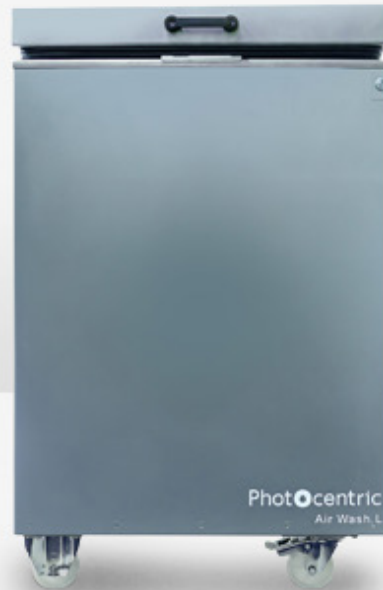

Available on these products

Wash 15

The perfect desktop washing solution, delivering precise results in minutes. With a 15 litre capacity and compact dimensions, Wash 15 is ideal for dental applications and locations where space is at a premium. Supplied with a custom bracket for LC Opus, Wash 15 can perform 140 cleaning cycles before the resin cleaner needs replacing.

Air Wash L

The Air Wash L is designed to operate 24 hours a day and is ideal for supporting large scale production. With an 80 litre capacity and sturdy wheels for mobility, the Air Wash L uses air agitation to create bubbles which provide a more thorough clean on complex parts.

Cure M+

The 405nm wavelength, Cure M+ optimises the strengthening and drying of models to maximise material properties. With a large chamber volume and time-regulated control, the Cure M+ is the perfect unit to complete your printing process.
